

UNIVERSITY OF  
CAMBRIDGE

## *Seminario*

### ***Simon D. Guest***

*Department of Engineering  
University of Cambridge*

*Simon Guest is Professor of Structural Mechanics in the Structures Group of the Department of Engineering at the University of Cambridge, where he was the Head of the Civil Engineering Division from 2016 to 2024. His research work straddles the border between traditional structural mechanics and the study of mechanisms, with particular regard to morphing lattice structures, biological structures, symmetry, bistable structures, and deployable structures.*
